**DBT® Skills Manual for Adolescents**

**Jill H Rathus and Alec L Miller**  
Pbk | 392pp | 9781462515356 | 20/11/2014  
AS95 | NZ$109 | Guilford Publications Inc

From leading experts who have trained thousands of professionals in dialectical behaviour therapy (DBT), this manual provides indispensable tools for treating adolescents with emotional or behavioural problems of any level of severity. Clinicians are guided step-by-step to teach teens and parents five sets of skills: Mindfulness; Distress Tolerance; Walking the Middle Path (a family-based module developed by the authors specifically for teens) Emotion Regulation; and Interpersonal Effectiveness.

**Building Motivational Interviewing Skills: A Practitioner Workbook 2ed**

**David Rosengren**  
Pbk | 513pp | 9781462532063 | 12/09/2017  
AS95 | NZ$109 | Guilford Publications Inc

Many tens of thousands of mental health and health care professionals have used this top training resource - now significantly revised with 65% new content reflecting important advances in the field - to develop and sharpen their skills in motivational interviewing (MI). Clear explanations of core MI concepts are accompanied by carefully crafted sample dialogues, exercises, and practice opportunities. Readers build proficiency for moving through the four processes of MI: engaging; focusing; evoking; and planning.

**The Targeting System of Language**

**Leonard Talmy**  
Hbk | 656pp | 9780620368979 | 5/11/2017  
AS99 | NZ$119 | MIT Press

In this text, Leonard Talmy proposes that a single linguistic/cognitive system, targeting, underlies two domains of linguistic reference, those termed anaphora (for a referent that is an element of the current discourse) and deixis (for a referent outside the discourse and in the spatiotemporal surroundings). Talmy argues that language engages the same cognitive system to single out referents whether they are speech-internal or speech-external.

**Motivational Interviewing in the Treatment of Psychological Problems 2ed**

**Hal Arkowitz, William Miller and Stephen R**  
Pbk | 400pp | 9781462531020 | 3/01/2017  
AS63 | NZ$74 | Guilford Publications Inc

This authoritative guide, now significantly revised and expanded, has given tens of thousands of clinicians proven tools for helping clients resolve ambivalence and mobilise their energy, commitment, and personal resources for change. Leading experts describe ways to combine motivational interviewing (MI) with other treatments for a wide range of psychological problems, including depression, anxiety disorders, eating disorders, posttraumatic stress disorder, and others.

**DBT® Skills Training Manual 2ed**

**Marsha M Linehan**  
Pbk | 504pp | 9781462516995 | 20/10/2014  
AS102 | NZ$119 | Guilford Publications Inc

From Marsha M Linehan - the developer of dialectical behaviour therapy (DBT) - this comprehensive resource provides vital tools for implementing DBT skills training. The reproducible teaching notes, handouts, and worksheets used for over two decades by hundreds of thousands of practitioners have been significantly revised and expanded to reflect important research and clinical advances. The book gives complete instructions for orienting clients to DBT, plus teaching notes for the full range of mindfulness, interpersonal effectiveness, emotion regulation, and distress tolerance skills.

**Thought and Language (Revised and Expanded)**

**Lev S Vygotsky**  
Pbk | 392pp | 9780625317713 | 13/07/2012  
AS83 | NZ$57 | MIT Press

Since it was introduced to the English-speaking world in 1962, Lev Vygotsky's *Thought and Language* has become recognised as a classic foundational work of cognitive science. Its 1962 English translation must certainly be considered one of the most important and influential books ever published by the MIT Press. In this highly original exploration of human mental development, Vygotsky analyses the relationship between words and consciousness, arguing that speech is social in its origins and that only as children develop does it become internalised verbal thought.

**Biological Psychology**

**Suzanne Higgs, Alison Cooper, Jonathan Lee**  
Pbk | 504pp | 9780857026222 | 29/11/2014  
AS104 | NZ$122 | Sage Publications Ltd

Biological Psychology guides psychology students through the key biological concepts that determine how we act. Coupling accessible coverage of the subject with deeper spots that push discussion further and encourage critical thinking, this comprehensive text is the ideal introduction to brain and behaviour. Through its wide, accessible coverage, Biological Psychology guides readers clearly through the entirety of the subject. Sensation, movement, sleep, eating, and emotions are all explained, with further chapters on the biological basis of psychological disorders and the effects of drug-taking.**

**Transcendent Mind: Rethinking the Science of Consciousness**

**Imants Baruss and Julia Mossbridge**  
Hbk | 256pp | 9781438227737 | 15/08/2016  
AS133 | NZ$154 | American Psychological Assoc

Where does consciousness come from? For most scientists and laypeople, it is axiomatic that something in the substance of the brain - neurons, synapses and gray matter in just the right combination - create perception, self-awareness, and intentionality. Yet despite decades of neurological research, that “something” - the mechanism by which this process is said to occur - has remained frustratingly elusive. This is no accident, as the authors of this text argue, given that the evidence increasingly points to a startling fact: consciousness may not, in fact, reside in the brain at all. In this wide-ranging and deeply scientific book, Imants
A Natural History of Human Morality
Michael Tomasello
Hbk | 208pp | 9780674088641 | 4/12/2015
A Natural History of Human Morality offers the most detailed account to date of the evolution of human moral psychology. Based on extensive experimental data comparing great apes and human children, Michael Tomasello reconstructs how early humans gradually became an ultra-cooperative and, eventually, a moral species. The text shows how, as a result of key evolutionary steps, contemporary humans possess both a second-personal morality for face-to-face engagement with individuals and a group-minded 'objective' morality that obliges them to the moral community as a whole.

Handbook of Counseling Women 2ed
Mary Kopol and Merle Keitel
Pbk | 696pp | 9781483385810 | 25/10/2016
The Handbook of Counseling Women, edited by Mary Kopol and Merle Keitel, draws together a nationally recognized group of contributing scholars and practitioners to address current theories, research, and issues relevant to the mental and physical well-being of women. Comprehensive and accessible, the Second Edition is organised into three parts covering theoretical, sociocultural, biological, and developmental considerations; assessment, diagnosis, and intervention; and supervision, research, and ethics.

Cognitive Development: Infancy Through Adolescence 2ed
Kathleen Galotti
Pbk | 488pp | 9781483379737 | 26/01/2016
Cognitive Development: Infancy Through Adolescence offers a dynamic look at the cognitive abilities of infants, pre-schoolers, children, and adolescents. It weaves together a variety of theoretical perspectives, and considers issues of research methodology carefully. The organisation of the text is chronological, giving students a look at the ‘whole child’, although certain chapters feature a hybrid organisation to consider special topics. Up-to-date, detailed, and written in a clear, engaging, and personal style, this text is accessible and engaging for students.

Cognitive Psychology: Revisiting the Classic Studies
Michael Eysenck and David Groome
Pbk | 224pp | 9781446299475 | 1/05/2015
Revisiting the Classic Studies is a series of texts that introduces readers to the studies in psychology that changed the way we think about core topics in the discipline today. Cognitive Psychology: Revisiting the Classic Studies traces 14 ground-breaking studies by researchers such as Chomsky, Tulving and Stroop to re-examine and reflect on their findings and engage in a lively discussion of the subsequent work that they have inspired. COURSE USE: Suitable for students on cognitive psychology courses at all levels.

Make It Stick: The Science of Successful Learning
Peter Brown, Henry Roediger III and Mark M
Hbk | 336pp | 9780674729018 | 14/04/2014
To most of us, learning something ‘the hard way’ implies wasted time and effort. Good teaching, we believe, should be creatively tailored to the different learning styles of students and should use strategies that make learning easier. Make It Stick turns fashionable ideas like these on their head. Drawing on recent discoveries in cognitive psychology and other disciplines, the authors offer concrete techniques for becoming more productive learners. Memory plays a central role in our ability to carry out complex cognitive tasks, such as applying knowledge to problems never before encountered and drawing inferences from facts already

Evidence-Based Practice of Cognitive-Behavioral Therapy 2ed
Deborah Dobson and Keith Dobson
Hbk | 354pp | 9781462528455 | 1/01/2017
Synthesising the evidence base for cognitive-behavioural therapy (CBT) and translating it into practical clinical guidelines, this text has enhanced the knowledge and skills of thousands of therapists and students. The authors - an experienced clinician and a prominent psychotherapy researcher - discuss how to implement core CBT techniques, why and how they work, and what to do when faced with gaps in scientific knowledge.

Reflection in CBT
Beverly Haarhoff and Richard Thwaites
Pbk | 216pp | 9781446258897 | 9/01/2016
Developing skills and competency in CBT is a complex process of which self-observation and self-reflection are an essential part. In this new text, the authors outline the rationale for a focus on self-reflective practice in CBT, before offering practical and accessible guidelines demonstrating how this can be achieved in training and practice.

CBT for Beginners 2ed
Jane Simmons and Rachel Griffiths
Pbk | 272pp | 9781446358010 | 30/12/2013
CBT for Beginners, Second Edition is designed to help your students make the best start in their careers as confident CBT therapists. Comprising all the main theory and competencies covered in training, this text takes your students right back to basics, equipping them with the essential nuts and bolts to practice CBT effectively. The text also includes further reading lists to allow students to take what they have learnt to the next step.
Ancillary Materials

Ebook Available

Cognitive Therapy Techniques for Children and Adolescents
Robert D Friedberg, Jessica M McClure and Phyllis Beck
Hbk | 326pp | 9781462520077 | 31/10/2014
AS61 | NZ$69 | Guilford Publications Inc

Providing a wealth of practical interventions and activities - all organised within a state-of-the-art modular framework - this invaluable book helps child clinicians expand their cognitive-behavioural therapy (CBT) toolkits. Going beyond the basics, the authors provide effective ways to engage hard-to-reach clients, address challenging problems, and target particular cognitive and behavioural skills. Fun and productive games, crafts, and other activities are described in step-by-step detail. COURSE USE: Suitable for graduate level courses in child therapy.

Making Cognitive-Behavioral Therapy Work
Deborah Roth Ledley, Brian P Marx and Richard M. Weissman
Hbk | 292pp | 9781606239124 | 24/08/2010
AS79 | NZ$92 | Guilford Publications Inc

Used around the world by novice clinicians as well as experienced therapists new to cognitive-behavioral therapy (CBT), this bestselling book has been widely adopted as a text in clinical training programmes. The authors provide a vivid picture of what it is actually like to do CBT and offer practical guidance for becoming a more skilled and confident clinician. Vignettes and examples illustrate the entire process of therapy, from intake and assessment to case conceptualisation, treatment planning, intervention, and termination.

Cognitive Behavioral Therapy Techniques and Strategies
Amy Wenzel, Keith Dobson and Pamela Hay
Hbk | 240pp | 9781438823777 | 1/06/2016
AS119 | NZ$139 | American Psychological Assoc

Cognitive behavioral therapy (CBT) is a complex and evolving model of treatment that has been developed for and applied to a wide range of mental and physical problems and disorders. CBT's flexibility as a model can also make it a difficult technique to master. To be an effective cognitive behavioral therapist, the practitioner must be able to learn the broad principles related to CBT, and understand how to adapt those principles to his or her varied clients. This volume brings together three esteemed leaders and trainers in the field to elucidate the key principles, frameworks, and therapeutic processes that are used by effective practitioners.

Ebook Available

Doing CBT: A Comprehensive Guide to Working with Behaviors, Thoughts, and Emotions
David Tolin
Hbk | 594pp | 9781462527076 | 8/08/2016
AS119 | NZ$142 | Guilford Publications Inc

This accessible text provides a complete introduction to the art and science of cognitive-behavioral therapy (CBT). In a witty, straight-talking style, David Tolin explains core concepts and presents effective techniques for addressing the behavioural, cognitive, and emotional elements of psychological problems. Vivid examples of several clients are followed throughout the book, which concludes with three chapter-length case illustrations.

Supervision Essentials for Cognitive–Behavioral Therapy
Cory Newman and Danielle Kaplan
Hbk | 181pp | 9781333822797 | 1/06/2016
AS$4.99 | NZ$64 | American Psychological Assoc

Cognitive–behavioral therapies are the most popular form of mental health services offered today. But with this popularity comes an urgent need for standardised training and education for emerging cognitive–behavioral therapy (CBT) clinicians. This handy guide offers an evidence-based approach to supervision of emerging CBT practitioners. The authors’ approach is based on two key concepts: feedback that is geared toward strengths as well as weaknesses, and stimulates problem-solving and growth; and demonstration, by which a supervisor takes part in role-playing exercises.

Clinical Practice of Cognitive Therapy with Children and Adolescents
Robert D Friedberg and Jessica M McClure
Hbk | 494pp | 9781462519804 | 4/06/2015
A$102 | NZ$119 | Guilford Publications Inc

Widely regarded as the standard teaching text and practitioner reference, this book provides a complete introduction to doing cognitive-behavioural therapy (CBT) with 6 to 18 year olds. The authors offer a blueprint for formulating cases and tailoring treatment to each child’s or adolescent’s unique developmental and clinical needs. Coverage includes how to orient children and families to cognitive therapy, structure each session, and implement a wide range of CBT techniques. Reproducible forms and handouts can be downloaded and printed. COURSE USE: Serves as a text in CBT with Children and Adolescents and related

Cognitive Behavioural Therapy for Child Trauma and Abuse
Jacqueline S Feather and Kevin R Ronan
Pbk | 144pp | 9781849050869 | 15/05/2010
A$39.99 | NZ$45.99 | Jessica Kingsley Publishers

This book uses an evidence-based cognitive-behavioural treatment model to assist children and adolescents aged 9-15 years to resolve trauma symptoms and increase their coping skills. The approach is made up of 16 step-by-step sessions to carry out with the young person, and includes worksheets and activities using arts and crafts. The model uses four phases: strengthening the child’s psychosocial context; enhancing their coping skills; processing their trauma through gradual exposure; and addressing specific issues that the child may have and preventing relapse.

Parent-Led CBT for Child Anxiety: Helping Parents Help Their Kids
Cathy Creswell, Monika Parkinson, Kerstin
Hbk | 210pp | 9781462527786 | 8/11/2016
A$62 | NZ$72 | Guilford Publications Inc

Parents can play a strong role in helping their children overcome anxiety disorders - given the right tools. This innovative, research-based book shows clinicians how to teach parents cognitive-behavioural therapy (CBT) techniques to use with their 5- to 12-year-old. Session-by-session guidelines are provided for giving parents the skills to promote children’s flexible thinking and independent problem solving, help them face specific fears, and tackle accompanying difficulties, such as sleep problems and school refusal.

Integrating Clinical Hypnosis and CBT: Treating Depression, Anxiety, and Fears
Robin Chapman
Pbk | 150pp | 9780826171047 | 5/12/2013
A$64 | NZ$74 | Springer Publishing Co

This workbook describes a method that combines one of the newest treatments in behavioral health-cognitive behavioral therapy (CBT)-with one of the oldest-clinical hypnosis. The author provides step-by-step guidance in the joint application of these two modalities for the optimal treatment of depression, anxiety, fears, and phobias. The book is based on studies suggesting that clinical hypnosis in combination with CBT may increase treatment efficacy. With a systematic approach, the workbook covers the theoretical foundations of this integrated modality and explains how to assess whether such treatment is warranted for a particular case.

CBT for Beginners 3ed
Jane Simmons and Rachel Griffiths
Pbk | 272pp | 9781562424082 | 11/11/2017
A$65 | NZ$76 | Sage Publications Ltd

This book provides the ideal starting point for trainees and practitioners needing a no-nonsense, clear guide to the basics of CBT. It will equip them with the knowledge and know-how, covering all the main theory and competencies to help them practice CBT effectively and confidently. Focusing on case formulation, the authors show readers how to build a ‘picture’ of each client, using their case history to inform interventions. This third edition provides exercises, case dialogues and summary boxes and includes updated references, further reading and additional new content.

Assessment and Case Formulation in Cognitive Behavioural Therapy 2ed
Sarah Corrie, Michael Townsend and Adrian C
Pbk | 344pp | 9781473902763 | 9/01/2016
A$79 | NZ$95 | Sage Publications Ltd

This text offers a unique philosophical, theoretical and process-focused introduction to one of the cornerstones of CBT: assessment and case formulation. Updated and expanded to take account of the vast developments in the field of CBT since its first publication, this second edition follows a clear two part structure: Part One introduces trainees to the key theory, practice and processes of assessment and case formulation, Part Two provides practical illustrations of the theory.

CBT with Children, Young People and Families
Peter Fuggle, Sandra Dunsmuir and Vicki Cu
Pbk | 312pp | 9780857027283 | 31/12/2012
A$73 | NZ$85 | Sage Publications Ltd

This timely book uniquely addresses the application of CBT to children and young people within health, school, and community contexts. With the recent expansion of increasing access to psychological therapies (IAPT) CBT is increasingly applied to work with children outside the traditional therapy clinic. This book provides accessible knowledge and practice skills for professional staff working with troubled children and young people in real-world settings. Taking into consideration complex difficulties that do not always fit fixed length treatments, the authors take a much-needed realistic approach to applying CBT to childhood problems.

Game-Based Cognitive-Behavioral Therapy for Child Sexual Abuse
Craig Springer and Justin Misurell
Pbk | 448pp | 9780826123367 | 15/12/2014
A$99 | NZ$116 | Springer Publishing Co

This unique text, written by recognised experts on the evaluation and treatment of childhood sexual abuse, is the first to disseminate a comprehensive and integrative approach to treating child sexual abuse that combines the power of structured play therapy with cognitive-behavioural treatment. Created by the authors, game-based cognitive-behavioural therapy (GB-CBT) is a complete therapeutic package containing engaging techniques and effective strategies to treat the problems experienced by children and families impacted by sexual abuse. The book provides the rationale, underlying theory, and step-by-step instructions for
CBT Supervision
Sarah Corrie and David A Lane
Pbk | 256pp | 9781446256397 | 11/04/2015
A$89

What is good CBT supervision? What makes an effective supervisor? How can qualified CBT therapists learn to become good CBT supervisors who work effectively with their supervisees? These are some of the questions addressed in this practical new book, examining what it takes to be a competent and confident CBT supervisor.

Using the author’s unique framework of learning - the PURE Supervision Flower - the book equips trainees with the skills and competencies needed to prepare for, undertake, refine, and enhance supervision practice across a wide range of settings.

The CBT Handbook
Windy Dryden and Rhena Branch
Pbk | 512pp | 9781849205528 | 30/11/2011
AS$89

This second edition is a step-by-step guide to the core techniques used by practitioners in achieving therapeutic change using the cognitive behavioural approach. Drilling down into the skills required at each stage of the therapeutic process, this new edition brings the therapeutic relationship to the forefront, showing trainees practically how to build and maintain a successful working alliance with their clients. Case examples in a variety of settings showcase skills in action, while the text’s straightforward writing style and logical structure following the progression of therapy make it highly accessible for those with little or no prior experience.

Case Studies in Neural Data Analysis: A Guide for the Practicing Neuroscientist
Mark Kramer and Uri Eden
Pbk | 384pp | 9780262529372 | 4/9/2016
A$107

As neural data becomes increasingly complex, neuroscientists now require skills in computer programming, statistics, and data analysis. This text teaches practical neural data analysis techniques by presenting example datasets and developing tools and techniques that can be used by researchers. Each chapter begins with a specific example of neural data, which motivates the techniques and methods described. The exercises are based on real-world data and the tools necessary for researchers to gain the skills required to handle complex datasets.

The Computational Brain
Patricia Churchland and Terrence Sejnowski
Pbk | 504pp | 9780262035828 | 26/2/2017
A$96

Since the publication of the first edition of The Computational Brain two decades ago, the field of artificial cognitive systems has grown at an unprecedented rate, and the book remains a classic introduction to the subject. This new edition covers the state of the art in artificial cognitive systems as of fall 2015, when the book was written.

MATLAB for Brain and Cognitive Scientists
Mike Cohen
Pbk | 576pp | 9780262035828 | 26/2/2017
A$96

MATLAB’s balance of usability, visualisation, and widespread use makes it one of the most powerful tools in a scientist’s toolbox. In this book, Mike Cohen teaches brain scientists how to programme in MATLAB, with a focus on applications most commonly used in neuroscience and psychology. Although most MATLAB tutorials will abandon users at the beginner’s level, leaving them to sink or swim, MATLAB for Brain and Cognitive Scientists takes readers from basic concepts to intermediate and advanced levels of MATLAB programming, helping them gain real expertise in applications that they will use in their work.

Animal Electricity: How We Learned That the Body and Brain Are Electric Machines
Robert B Campenot
Pbk | 352pp | 9780747936818 | 15/01/2016
A$76 | NZ$76 | Harvard University Press

Like all cellular organisms, humans run on electricity. Slight imbalances of electric charge across cell membranes result in sensation, movement, awareness, and thinking—nearly everything we associate with being alive. Robert Campenot offers a comprehensive overview of animal electricity, examining its physiological mechanisms as well as the experimental discoveries that form the basis for our modern understanding of nervous systems across the animal kingdom. Cells work much like batteries. Concentration gradients of sodium and potassium cause these ions to flow in and out of cells by way of protein channels.

Psychiatry in the Scientific Image
Dominic Murphy
Pbk | 422pp | 9780625174477 | 1/02/2012
A$59.99 | NZ$59 | MIT Press

In Psychiatry in the Scientific Image, Dominic Murphy looks at psychiatry from the viewpoint of analytic philosophy of science, considering three issues - how we should conceive of, classify, and explain mental illness. If someone is said to have a mental illness, what about it is mental? What makes it an illness? How might we explain and classify it? A system of psychiatric classification settles these questions by distinguishing the mental illnesses and showing how they stand in relation to one another.

Music Therapy with Families
Stine Jacobsen and Grace Thompson
Pbk | 344pp | 9781849056304 | 1/10/2016
A$44.99 | NZ$44.99 | Jessica Kingsley Publishers

This comprehensive book describes well-defined models of music therapy for working with families in different clinical areas, ranging from families with special needs children or dying family members through to families in psychiatric or paediatric hospital settings. International contributors explain the theoretical background and practice of their specific approach, including an overview of research and illustrative case examples.

Sitting Together: Essential Skills for Mindfulness-Based Psychotherapy
Susan Pollak, Thomas Pedulla and Ronald Si
Pbk | 240pp | 9781462527731 | 7/08/2016
A$46.99 | NZ$46.99 | Guilford Publications Inc

This practical guide helps therapists from virtually any specialty or theoretical orientation choose and adapt mindfulness practices most likely to be effective with particular patients, while avoiding those that are contraindicated. The authors provide a wide range of meditations that build the core skills of focused attention, mindfulness, and compassionate acceptance. Vivid clinical examples show how to weave the practices into therapy, tailor them to each patient’s needs, and overcome obstacles.

New Title
Art Therapy in Private Practice
James West
Pbk | 392pp | 9781785920431 | 21/09/2017
A$52.99 | NZ$53 | Jessica Kingsley Publishers

Art Therapy in Private Practice: Theory, Practice and Research in Changing Contexts is an essential handbook for art therapy students considering private practice. It provides insight into the range of approaches, clinical settings, ethical issues and professional considerations when working in private practice and gives advice on common hurdles, such as establishing boundaries and maintaining self-care.

The Future of the Brain: Essays by the World’s Leading Neuroscientists
Gary Marcus and Jeremy Freeman
Pbk | 304pp | 9780691173313 | 1/10/2016
A$35.99 | NZ$41.99 | Princeton University Press

An unprecedented look at the quest to unravel the mysteries of the human brain, The Future of the Brain takes students to the absolute frontiers of science. Original essays by leading researchers such as Christof Koch and George Church, describe the spectacular technological advances that will enable us to map the more than eighty-five billion neurons in the brain, as well as the challenges that lie ahead in understanding the anticipated deluge of data and the prospects for building working simulations of the human brain.

Neuroscience: A Historical Introduction
Mitchell Glickstein
Pbk | 418pp | 9780262543611 | 14/08/2017
A$84 | NZ$89 | MIT Press

This introduction to neuroscience is unique in its emphasis on how we know what we know about the structure and function of the nervous system. What are the observations and experiments that have taught us about the brain and spinal cord? The text traces our current neuroscientific knowledge to many and varied sources, including ancient observations on the role of the spinal cord in posture and movement, nineteenth-century neuroanatomists’ descriptions of the nature of nerve cells, physicians’ attempts throughout history to correlate the site of a brain injury with its symptoms, and experiments on the brains of invertebrates.

Social Cognition: From Brains to Culture 2ed
Susan T Fiske and Shelley E Taylor
Pbk | 592pp | 9781462528156 | 1/01/2013
A$98 | NZ$115 | Sage Publications Ltd

The field of social cognition has exploded in exciting 21st century directions; people making sense of themselves and others creates universally appealing psychological science. In the intervening years since the previous edition, this appeal has stretched out beyond its traditional borders to capture the imaginations of new audiences as well. Now, Social Cognition: From Brains to Culture 2ed is not only a must-read in current psychology but also bridging from social psychology to social neuroscience and to cultural approaches, as well as developmental, clinical, educational, health, political, and cognitive psychology too. COURSE USE: Suitable for
